

Remarks/Arguments:

The above Amendments and these Remarks are in reply to the Office Action mailed May 1, 2008.

Claims 1-67 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shiigi et al. (U.S. Publication No.: 2003/0014442) and Knudsen et al. (Learning Java, O'Reilly, May 2000).

The independent claims have been amended to add the feature that "the theme control and additional theme control are part of the logical hierarchy". This feature is supported by Figure 2 and paragraphs [0028] to [0035] of the present invention's specification. This feature is not shown or made obvious in the cited prior art.

In light of the above, it is respectfully submitted that all of the claims now pending in the subject patent application should be allowable, and a Notice of Allowance is requested. The Examiner is respectfully requested to telephone the undersigned if he can assist in any way in expediting issuance of a patent.

The Commissioner is authorized to charge any underpayment or credit any overpayment to Deposit Account No. 06-1325 for any matter in connection with this response, including any fee for extension of time, which may be required.

Respectfully submitted,

Date: May 30, 2008
